- PAVEMENT RESURFACING
- PAVEMENT CRACK SEALING
- PAVEMENT SEAL COATING

* NOTE

Please note that the street list shown is dynamic in that streets may be added or removed based on several factors. The main factor is the fluctuation of prices which may change whether streets need to be removed or added to the project since the street program has a fixed budget. In addition, depending upon the severity of the winter season or other unforeseen circumstances, some streets may deteriorate faster than others. This may require that a street to be paved in a certain year be pushed back or accelerated in the program.
