MOSQUITO ABATEMENT CHECK LIST

Here are some places where you might find mosquito larvae in your yard.
You may want to save this list so you can check your yard once a week - especially during the summer months.

________ Have you thrown away or covered any old tires in your yard? (For tire swings or playground equipment, drill a hole in the bottom to drain the water.)

________ Are there any toys left out in the yard that hold water?

________ Check tree-holes for water. If water is found, fill or treat the tree-hole.

________ Keep ditches clean of weeds, trash and lawn clippings to prevent mosquito breeding sites.

________ Saving rainwater for plants? Cover the bucket with a piece of window screen.

________ Flush out your birdbath once a week to prevent mosquito breeding.

________ Any tin cans, plastic cups, bottles, or debris in your yard? Throw them out before they become mosquito homes.

________ Is your pet's water bowl outside? Clean it and add fresh water every day. Mosquitoes can transmit dog heartworm, too!

________ Empty swimming pool tarps, boat tarps, etc.

________ Clean roof gutters. Empty tarps that hold water.

________ Empty wading pools daily.

________ Is there anything else in your yard which holds water and can breed mosquitoes?

Please contact us if there may be possible breeding sites in your area. We are here to serve you!
PLEASE READ AND FOLLOW

If you are receiving this flyer then you may be breeding disease carrying mosquitoes on your property!
